1. The High-Income/Occupation Segments to Maximize Revenue

Key influencers Top segments

What influences Total Revenue to ?

This links **Road Bikes** from **Bikes Category** generate the most revenue for the company and to target them for **cross-selling** of products

Income Level	Total Revenue	Total Orders	Revenue %
⊖ Very High	\$4,37,648.02	316	1.76%
Professional	\$1,29,598.95	90	0.52%
Management	\$3,08,049.07	226	1.24%
⊕ High	\$27,42,678.69	2161	11.01%
⊕ Low	\$97,08,013.58	11106	38.97%
⊖ Average	\$1,20,26,226.89	11581	48.27%
Management	\$24,00,980.97	2457	9.64%
Skilled Manual	\$29,25,876.36	2844	11.74%
Professional	\$66,99,369.56	6280	26.89%
Total	\$2,49,14,567.18	25164	100.00%

The Customers with Occupation as **Professionals** with **Average Income** Level generate the most revenue. This tells you the demographic to target with personalized offers or who to prioritize in acquisition or Marketing campaigns.

2. Marketing Strategy & Campaign Response

The sharp, immediate spike in Total Orders in July 2021 directly correlates with the four-week '**Summer Adventure Launch**' campaign. The campaign was successful in driving high initial order volume evidently.

Revenue by Product Category for Key Demographics

The bar chart filters to show which product categories professionals spend the most on. Since Accessories is highest, your personalized outreach to Professionals should exclusively promote Accessories. This will optimize campaign relevance.

Recommendations

Marketing Strategy

The '**Average**' **Income** segment (comprising 46% of customers) accounts for **49% of total revenue**. Their purchases are concentrated in high-margin products like 'Road Bikes'.

Reallocation of the marketing budget to personalized email campaigns targeting the 'Average' income segment with exclusive offers on new high-margin products, aiming for a 15% increase in AOV (Average Order Value)

High Margin Product Opportunity

While **Bikes** drive the highest total revenue, they yield a **Gross Margin of only 41.74%**. Conversely, the **Accessories** category, despite having a smaller revenue contribution, maintains an extremely high **67.88% Gross Margin**.

Action: This high profitability suggests that cross-selling and bundling accessories with every major purchase should be a core strategy to immediately boost overall company profit

Integrate accessories more aggressively into the sales process. Train sales staff and optimize the e-commerce checkout flow to always cross-sell at least two high-margin accessory items to every customer purchasing a Bike.
